

## Metropolitan Retail Distribution:

A solution for Retail Stores located in congested metropolitan locations

To remedy delivery stresses from retailers within metropolitan areas, Cannon Equipment has developed a material handling carts solution that provides a less costly method of receiving deliveries. The three cart options listed on the reverse page offers savings in time, delivery fines, store interruptions, and energy conservation

Challenge	Solution
Delivery trucks tie-up traffic, are often unable to find appropriate space to unload, and often get parking violations	With a CannonCart® distribution system, trucks are able to unload merchandise in rolling carts quickly meaning less time for traffic to get tied-up and decreased chances of receiving parking violations.
As a result of extreme daytime traffic, delivery trucks have a very small window of access to the store (usually in the early morning hours), so deliveries need to be made quickly and without disruption.	CannonCarts® allow the distribution centers to pre-load the trucks according to delivery schedules which enables the driver to quickly locate the designated cart and deliver the merchandise quickly and efficiently. CannonCarts® can allow for up to 75% time savings*
Store personnel are often used to unload delivery trucks and can be diverted from their regular duties. This can leave customers in the store unattended resulting in a less than desired customer experience and allowing more opportunities for inventory shrinkage to occur.	CannonCarts® are easily maneuvered by one person allowing store personnel to focus on customers and not on attending to store deliveries.
Doors are often left open during deliveries in both summer and winter months leading to higher energy costs.	When merchandise is delivered on CannonCarts®, there is no need for multiple trips into and out of the retail location.
Once the delivery is made, store personnel are often required to organize, unpackage, and stage items for stocking on the retail floor.	CannonCarts® eliminate the extra step of transferring product onto a cart before going to retail floor.

\* Savings versus unloading packages/merchandise by hand

## ONE SHELF, FOUR SIDED CART F- 44

#11179-900C

### SPECIFICATIONS

<b>Depth</b>	31-7/8"
<b>Width</b>	44"
<b>Height</b>	70"
<b>Shelving</b>	1
<b>Number of Sides</b>	4
<b>Construction</b>	Folding
<b>Cart Weight</b>	170 Lbs
<b>FOB Point</b>	Cannon Falls, MN
<b>Casters</b>	(4) TPR Composite Wheels
<b>Caster Size</b>	5" x 2"
<b>Caster Type</b>	3 Swivel, 1 Rigid
<b>Finish</b>	Zinc Plated
<b>Load Capacity</b>	1,200 lbs
<b>Options</b>	Additional Options Available
<b>Typical Lead Time</b>	Immediate Availability

## TWO SHELF, FOUR SIDED CART F-32

# 11180-900C

### SPECIFICATIONS

<b>Depth</b>	30"
<b>Width</b>	32-1/4"
<b>Height</b>	68"
<b>Shelving</b>	2
<b>Number of Sides</b>	4
<b>Construction</b>	Z-Nest
<b>Cart Weight</b>	105 Lbs
<b>FOB Point</b>	Cannon Falls, MN
<b>Casters</b>	(4) TPR Composite Wheels
<b>Caster Size</b>	5" x 2"
<b>Caster Type</b>	2 Swivel, 2 Rigid
<b>Finish</b>	Zinc Plated
<b>Load Capacity</b>	1,000 lbs
<b>Options</b>	No Additional Options
<b>Typical Lead Time</b>	Immediate Availability

## TWO SHELF, THREE SIDED CART F-44

# 83-9940-000

### SPECIFICATIONS

<b>Depth</b>	28"
<b>Width</b>	44-3/8"
<b>Height</b>	70"
<b>Shelving</b>	2
<b>Number of Sides</b>	3
<b>Construction</b>	Folding
<b>Cart Weight</b>	187 Lbs
<b>FOB Point</b>	Cannon Falls, MN
<b>Casters</b>	(4) Phenolic
<b>Caster Size</b>	6" x 2"
<b>Caster Type</b>	2 Swivel, 2 Rigid
<b>Finish</b>	Zinc Plated
