

Cannon Displays Attract Attention

Connect-A-Bench Base Unit Fixture

Create excitement and increase sales with this attractive cascading display for tray packs, potted plants and hanging baskets.

Connect-A-Bench

An Optional kit is available for expansion.

Optional powder coated paints, in a variety of custom colors, can be applied over our standard zinc-plated finish.

Plant Display Cart

These attractive mobile displays can be wheeled into secured areas at the end of the business day, moving valuable merchandise in and out of locations quickly and efficiently. The stretched design and low profile make this cart easily maneuverable so products can be displayed on the carts with shelves set in tilted or level positions anywhere in your store. An optional hanging basket attachment kit provides an attractive means for displaying baskets along with your bedding and potted plants.

Versatile, Long Lasting Cannon Carts Help Grow your Business

connecting products to people.

CARTS | POINT-OF-PURCHASE | AUTOMATION SOLUTIONS | FRONT-END MERCHANDISING

From Production to Retail, Cannon has the Tools to make your Business More Efficient and Profitable

There are several ways to ship nursery stock: deck trucks with lumber, pack it in corrugated boxes, sleeve and stack containers or roll it by the cartload. When you compare, you'll see how Cannon Carts will help your operation run smoother and faster. Cannon can help you meet your growth challenge with a mobile transport or display cart. Standard inventory models are available handling annuals, perennials or retail displays.

Distribution GroCart

These three sided carts with a 1" x 2" wire grid offer superior product protection, eliminating stretch wrap and the need to sleeve containers. The heavy-duty design handles large volumes quickly and efficiently, adding even more value to the product you deliver to retail chains.

Plant Transport Cart

Your staff won't struggle with our patented Plant Transport Cart. In fact, a single operator can easily remove or add shelves to 26 different shelving rails. This design will:

- Reduce your labor costs
- Improve productivity
- Trims costs during your busiest times of the year

This standard plant transport cart is used throughout the horticulture industry in production, packaging, processing, and shipping applications. It's high volume capacity and swift maneuverability have made it a valuable investment in reducing handling costs.

- Towbars and hitches are standard equipment for towing by hand, or by vehicle
- Socket assembly provides Knock-Down shipping and handling efficiencies as well as quick set-up without hardware or tools.

Specialized Tools for Nurseries & Greenhouses

Plant transport shelves glide effortlessly into position and remain locked during transit to prevent displacement and damage.

Over 25 Years in service to the Nursery Business

High Volume Transport Cart

High Volume Transport Cart

Demand for faster unloading at large retail accounts drove the application of the High-Cube cart. This design can yield additional cubic utilization to maximize your long haul efficiency. The High-Cube Cart system provides fast turnaround for delivery vehicles and store receiving personnel.

8, 6 and 5-Flat Euro Transport Carts

The "Euro-Style" carts from Cannon were designed for the transportation requirements of North American growers. With a heavy-duty design and incorporated roll-formed bases and reinforced shelves, Cannon has increased the "Euro" Carts longevity and strength.
