Cannon Equipment Reports No Injuries for Fourth Month in a Row

Safety has been and continues to remain a top priority for Cannon Equipment, its leadership team and employees. With three facilities nationwide, Cannon Equipment instituted a Safety Awareness Program to raise the visibility of safety across our facilities ensuring all employees maintain the highest standards of safe working practices. Cannon Equipment's effort to improve safety extends beyond our facilities doors, reminding employees that safety at home, is just as important as safety on the job.

By emphasizing to all employees the need to be aware of hazards, and to always work safely, Cannon Equipment has been proactive in ensuring that each employee goes home in the same condition as they came to work.
