### Description

This three-sided folding cart features a 2" X 2" wire grid on the sides and back for optimal containerization while eliminating the need for stretch wrapping product. With adjustable shelving for many different positions, respectively, and a depth of 43", this heavy duty cart can handle your heavy duty products. The 17 shelf rails are spaced 4" apart for optimal shelf placement and maximum cubic unitization and the reinforced design enables you to handle large volumes quickly and efficiently, adding even more value to the product you deliver. Folding to a depth of only 6 inches, and with a 1,500 pound load capacity, this zinc plated cart is a necessity for any efficient operation. Additionally, this cart is forklifable, offering an alternative method for loading and unloading

- Nursery: 8 Flat (48)
- Shelves & Strap sold separately
