Description

This zinc plated, heavy duty cart speeds product transportation and handling from point to point for both internal and external applications. 3 shelves are sloped 1-1/8" from front to back providing optimal load handling stability and product retention. Shelf clearance is 21" and the distance from the floor to the top front of the first shelf is 9-3/8". With a folding depth of 6 1/2" this cart can be securely stored in racks or L-frame configurations when not in use, freeing up valuable floor space. 4 swivel casters allow for easy maneuverability and eliminates the need for multiple handling methods.

- This cart is Forkliftable!
