

CARTPILOT™ GO

Instant power for nearly any cart to boost productivity and reduce worker strain

Support faster workflows & no downtime with CartPilot™ Go

Heavy, hard-to-move carts slow down operations, strain workers, and impact your bottom line. CartPilot™ Go changes that. This **easy-to-use system adds instant power and smoother steering** to nearly any new Cannon Equipment cart, helping workers move loads faster, safer, and with less effort. Simple controls make it quick to train operators, while a swappable battery keeps carts — and your team — moving all shift long without interruptions, making operations more efficient and workers happier.

CARTPILOT™ GO INSTANTLY IMPROVES WORKFLOW BY POWERING CARTS ON DEMAND

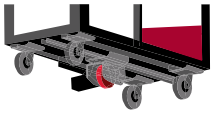

- **Create faster workflows with no downtime** using swappable batteries that keep carts powered and products moving all shift long
- **Safe & simple to operate** to reduce worker strain, fatigue and injury with smooth acceleration, controlled stopping and less physical exertion
- **Easier to maneuver and steer** allowing for tight 90-degree turns or precise travel down straight narrow aisles
- **Integrate with most new Cannon Equipment carts** to meet unique user needs based on cart size and style requirements

LEARN MORE

Power up carts & streamline operations with CartPilot™ Go

Powered fifth wheel

Accelerate the cart forward with the push of a button for easy operation.

Swappable batteries

Change out batteries with ease to remain powered without downtime.

Designed for simplicity & comfort

Ergonomic handle supports operator comfort and reduces strain while simple controls make the cart easier to operate with minimal training required.

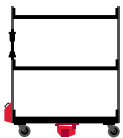

Controlled steering & easy maneuverability

Make tight turns and navigate narrow aisles with less effort and greater precision.

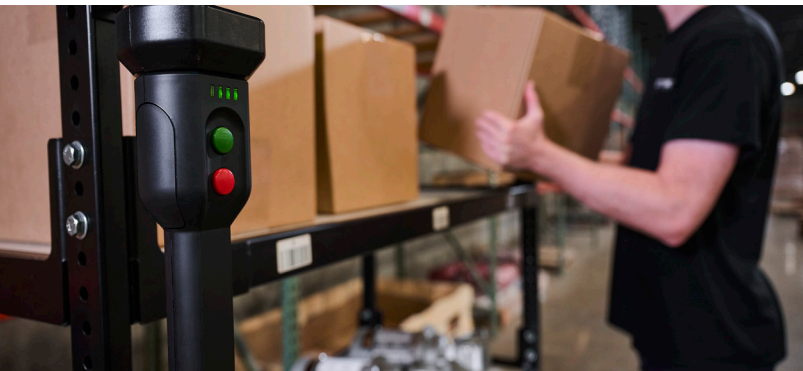

Quick, push-button braking

Controlled braking engages when the brake button is pressed.

Compact design

All drive components and batteries are hidden under the cart, keeping the cart's full usable space for storage.

Add power to your material handling, create faster workflows, and improve worker safety with CartPilot™ Go—powered by swappable batteries. With its enhanced maneuverability and smooth acceleration, operators can quickly and easily transport loads to their destinations saving time and reducing the risk of injury.
